Incidental Take Notice for Dane County

(MADISON, Wis.) – The Nine Springs Valley Interceptor Project may result in the "incidental taking" of a rare moth under a permit the Department of Natural Resources proposes to issue for the project. Incidental take refers to the unintentional loss of individual endangered or threatened animals or plants that does not put the overall population of the species at risk.

The Madison Metropolitan Sewerage District (MMSD) proposes sanitary sewer improvements along the Military Ridge Trail and Cannonball Path in the City of Fitchburg & the City of Madison. The project includes construction of a new sanitary interceptor sewer along with reconnecting existing local sewers and laterals. The proposed sanitary sewer will replace an existing run of sanitary sewer. As a result of construction, various sections of existing storm sewer will be replaced, a portion of the existing MMSD ductile iron forcemain will be relayed and a section of City of Madison ductile iron watermain will be relayed.

The presence of the state endangered silphium borer moth has been confirmed in the vicinity of the project site. DNR staff determined that the proposed project may result in the incidental taking of some moths.

The Department has concluded that the proposed project is not likely to appreciably reduce the likelihood of the survival or recovery of the species within the state, the whole plant-animal community of which it is a part or the habitat that is critical to its existence.

The conservation measures to minimize the adverse effect on the endangered species will be incorporated into the proposed Incidental Take Permit. Copies of the jeopardy assessment and background information on the silphium borer moth are available by searching the DNR website for [incidental take public notice](#) or upon request from Rori Paloski (608-264-6040 or rori.paloski@wi.gov).

The department is requesting comments from the public through November 6, 2020 regarding project-related impacts to the silphium borer moth. During the COVID-19 public health emergency, we request comments be sent via email or phone to Rori Paloski at 608-264-6040 or rori.paloski@wi.gov but can also be mailed to 101 S. Webster St., Madison, WI 53707.
